## **Allegro wins \$1.8M contract with Student Housing Australia**

Allegro Networks will deliver its market leading Smart Student solution to 36 Student Housing Australia sites across Melbourne. The contract, worth \$1.8M over 3 years, cements Allegro Networks as a leading provider of communication solutions for student accommodation providers in Australia.

“We are very pleased to secure Student Housing Australia as our latest strategic partner on the Smart Student solution. Student Housing Australia is one of the leading providers in one of the fastest growing sectors in the economy. “

Mr Waldie said the win recognized Allegro as a leader provider of student accommodation solutions. “Our solution is deployed in over 100 sites across Sydney, Melbourne, Brisbane, Adelaide, Gold Coast and Sunshine Coast. We would probably be the largest provider of complete solutions for student accommodation in Australia. Our solution is the product of years of development, and meets the communications needs of students, at high standards of service and great value.”

Mark McDonald, CEO of Student Housing Australia, said “We are growing fast, adding a dozen new sites every semester. We needed a telco partner who was as dynamic as us, and committed to our long run goals. We chose Allegro for the completeness of their technical solution, the capability of their team and their strategic partnering approach.”

Mr Waldie added, “If you run a student accommodation business, now is a good time to review your internet, voice and communications solution!”
