

**BIG COMPANY SPEEDS  
SMALL COMPANY PRICE**

### What is Allegro Connect?

Allegro Connect is a suite of connectivity building blocks that you can use to design your own network to suit your needs.

See the Allegro Connect Suite Fact Sheet for further information.

### What is Business Broadband\*?

Allegro's Business Broadband service is designed to deliver very high speeds at affordable prices. We use next generation wireless and wireline technologies, delivering speeds and quality usually reserved for big companies.

Business Broadband offers symmetric broadband at a range of speeds from 1 Mbps up to 10 Mbps at rates less than what others charge for slower connections.

Unlike ADSL services offered by other service providers, where upload speeds are much slower than download speeds, Allegro's symmetric services are full duplex, providing the same upload and download speed for maximum performance. This is critical for today's online business applications.

### Who is using Business Broadband?

Whether you are running ecommerce applications, VoIP or just looking for faster internet access, our Business Broadband product will deliver. It is perfect for video conferencing and media streaming. Business Broadband is aimed at users who demand high speeds, symmetric data rates and low contention.

### How much does Business Broadband cost\*?

Speed	5GB	10GB	50GB (Shaped)**	100GB
1 Mbps/1 Mbps	\$198.00	\$242.00	\$297.00	\$583.00
2 Mbps/2 Mbps	--	\$286.00	\$352.00	\$880.00
4 Mbps/4 Mbps***	--	--	\$572.00	\$1,430.00
10 Mbps/10 Mbps***	--	--	\$1089.00	\$2,717.00

\* The service enjoys guaranteed 99.9% service levels and contention ratios of 20:1 or less. All prices INCLUDE GST. An installation fee of \$495 applies to 12 month contracts and \$297 to 24 month contracts (Even less if your building already has Allegro shared access equipment on site). This service is terminated as Ethernet and Allegro retains ownership of all CPE used to deliver this. Installation within coverage area guaranteed within 5 business days. Professional installation charge of \$80 applies if a site visit is required to install the service. All data in excess of plan quota will be charged at \$0.09/MB except where noted. A fair use policy exists.

\*\* Rate limited after 50GB has been consumed in a 30 day period. There is no charge for the excess data used at the limited rate.

\*\*\* Only available in selected buildings. Not on G.SHDSL.

### Features & Benefits

- Very high speeds  
*Up to 10 Mbps Get the big company advantages!*
- Next day installation on request, guaranteed within 5 days  
*No more waiting weeks!*
- Prices that will surprise (and excite!) you
- Symmetric services  
*Transact effortlessly uploading and downloading at the same speeds. Try that with ADSL!*
- Highly reliable and secure  
*99.9% service level agreements*
- Contention ratios of 20:1 and below
- Flexible plan options

## Why Allegro Business Broadband?

Choose Allegro Networks for your broadband and get the Allegro advantage.

- **High speed advantage.** Want speed? Allegro offers speeds up to 10Mbps, at rates less than what others charge for slower connections.
- **Speedy installation advantage.** Want service now? Allegro can install next day on request, and guarantee to install within 5 days. No more waiting weeks as you do with other service providers.
- **Symmetric speed advantage.** Want to upload and download at the same fast speeds? Allegro offers symmetric high speed internet access, meaning information is uploaded and downloaded at the same high speeds. Most carriers offer either ADSL, which is much slower to upload than download, or charge more for symmetric services.
- **Reliable and secure advantage.** Concerned about reliability and security? Allegro's high speed broadband is backed by industry leading service levels to ensure you receive the highest availability, guaranteed throughput, lowest latency and packet loss over our network.
- **Flexibility advantage.** Want the flexibility to choose your speeds and download limits? Allegro offers a wide choice of speeds and limits to suit your current and future business needs.
- **Person to person service advantage.** Want to speak to the guy who is operating the network? Our customers love the fact that when they talk to our support team, they are talking to the people who operate the network. No relying on the old telephone companies. Can your service provider say that?.

It all adds up to a performance enhancing experience.

## How do we do it?

The Allegro advantage comes from investing in people and technology. We specialise in the next generation of wireless and wireline technologies.

We always employ the latest WiMAX, microwave and optical fibre ready equipment from carrier class vendors to keep pace with progress in the industry and to continuously improve the level of performance and service we can offer our customers.

In recognition of our industry leadership position, Allegro is one of the few carriers endorsed by the Federal Government under the Metro Connect Broadband program, to receive funding for metro networks.

## Other Allegro Products

Ask your Allegro sales representative for fact sheets on the following products.

### Premium Voice

Our VoIP voice services are used today by ordinary businesses like you who are switching to Allegro and saving money. They simply decided "no more expensive phone bills"! And because we own the network, we can guarantee true carrier grade voice quality over IP.

### Allegro Connect

Design a secure, inter-office environment with built-in redundancy using Allegro Connect. Allegro Connect also includes performance reporting, technical support, high level security and management control. Expect unbeatable performance at an affordable price.

### Coming soon...

### Allegro Data Centre

A fully in-sourced environment through which we deliver dedicated hosting, dedicated servers and co-location designed for companies with advanced internet applications. Supporting enterprise customers, the tier 2+ design implements the latest high availability, security and redundancy demands of customers.
