

**GREAT SAVINGS
LOW CAPITAL COST**

What is Allegro Business Voice?

Allegro Business Voice uses today's phone technology called Voice over Internet Protocol (VoIP). Basically, you make calls over your broadband service instead of on old style phone lines, saving you money. Clever!

Allegro Connect Business Voice is unique. First, we own our broadband network, so we provide a better quality of service than most other providers. Secondly, you can use your existing phone system and phones, meaning massive savings on up front costs. Lastly, we give you the option to keep your old phone line for backup, or cancel it and save on line rental charges. Either way, you will save money on calls.

How much does Business Voice Cost*?

Most customers save 20-40% on their phone bill, with our cost effective and convenient solution.

Compare our rates, they will surprise and excite you!

Charge	Biz 0	Biz 10	Biz 30
